

I have drive an 1 1/2 commute through Atlanta, Ga 5 days a week. I listen to the same radio station every morning. They were not on this morning because of Clear Channels fear they would be shut down by the FCC. While I agree that something needs to be done, but this drastic this soon is wrong. Howard Stern has been doing his show for over 10 years, and now what was OK is not OK. These guys in Atlanta the same way. They say no more indescient things than are said in all the proffesional offices I have worked in. If this is happening because the children might hear something offensive then that should be the parents responsibility. I have a 5 year old and I know what he watches and listens to. This is a shame a responsible parent like myself has lose some enjoyment because of irresponsible parents. If radio and TV is really all that bad then somebody has been doing a bad job for a long time and that's the FCC. I think everybody needs to be investigated.
